

Mobile Interface Solutions

from

Elan Digital Systems

www.elandigitalsystems.com

We have a new
solution for you
and we're very
excited about it...

It will make your design
task easier and
quicker and speed
up your time-to-
market...

Our solution is a device called
Versatile PC Card UART

or
VPU

ideal for PC Cards & CF cards
that have a serial data
connection

perfect for cards such as:

- Bluetooth radio
- RS232, 422, 485 interface cards
- Scanner interface
- Smart transmitters/tags
- RF modules with Serial I/O
- GSM, GPRS radio modules
- CDMA radio modules
- GPS modules

all easily created with the Elan VPU

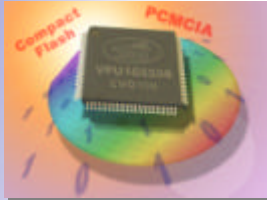

The Elan VPU comes in 2 packages

VPU16550

Ultra-thin 100-pin VQFP package

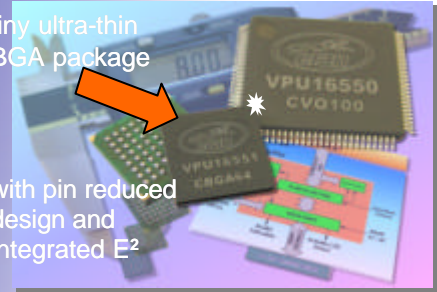

and...

VPU16551

- tiny ultra-thin BGA package
- with pin reduced design and integrated E²

We even offer you a Reference Kit that includes:

- *samples devices*
- *a sample card*
- *support software tools*
- *Card Information Structure generation*
- *a programming utility*

So you can evaluate and test your design

So you can evaluate and test your design

VPU16550 & VPU16551

They not only simplify your serial card design...

...but people will wonder how you designed it all so quickly!

Hello!
